

IS 340 Exam I

NAME: Nicholas Cullen Student A#: 25308071 Score: _____

I. Instructions for Multiple Choice Questions: Please circle the most appropriate choice, and you will receive no points if you circle more than one choice (5*8=40 points available).

1. A field in the logical design of a database corresponds to a _____ in the physical database.
a. column
2. A _____ is a group of interrelated files.
b. database
3. Which of the following may contain transitive dependencies, but not partial dependencies?
c. second normal form (2NF)
4. Which of the following is used to uniquely identify each record in a table?
a. primary key
5. Which of the following can be used to link the data in two or more tables together?
b. common field
6. Based upon the contents of the BOOKS table, which of the following SQL statements will display two columns in its output?
d. all of the above
7. Which of the following SQL statements will display all orders contained in the ORDERS table that have not been shipped to the customer?
c. SELECT * FROM orders WHERE shipdate IS NULL;
8. Which of the following keywords can be used to create a non-equality join?
b. JOIN...ON

II. Instructions for SQL Statement Questions: Please PRINT your SQL statements. You will not receive any points if I cannot read your writing, and you MAY get partial credits if your answer is incorrect but readable. You may want to run your SQL statements in Oracle to check the query results (15*4=60 points available).

1. Display the records (all columns) of those customers who are NOT from Florida, California or Georgia.

(Please print your SQL statement here):

```
SELECT *  
FROM Customers  
WHERE state NOT IN ('FL', 'CA', 'GA')  
/
```

2. Reduce the retail prices of all the books by 20% and display the book titles and the new retail prices in descending order (based upon the reduced retail price). The column heading of the reduced retail price should be NEW RETAIL PRICE

(Please print your SQL statement here):

```
SELECT title, retail * .8 AS "NEW RETAIL PRICE"  
FROM books  
ORDER BY "NEW RETAIL PRICE" DESC  
/
```

3. Use search pattern conditions to display the order# and the orderdate of those orders placed by customers whose last name ends with the letter "H" or "S". Please execute your SQL statement in Oracle and tell me how many rows are selected.

(Please print your SQL statement here):

```
SELECT c.lastname, o.order#, o.orderdate  
FROM orders o  
JOIN customers c ON o.customer# = c.customer#  
WHERE c.lastname LIKE '%H' OR c.lastname LIKE '%S'  
/
```

How many rows are selected? 10

4. Display the isbn, book title, publisher's ID and publisher's name of those Cooking or Children books published between 5/18/2000 and 1/26/2002 (inclusively). Please execute your SQL statement and tell me how many rows are selected.

(Please print your SQL statement here):

```
SELECT b.isbn, b.title, b.pubid, p.name  
FROM books b  
JOIN publisher p  
ON b.pubid = p.pubid  
WHERE b.category IN ('COOKING', 'CHILDREN')  
/
```

How many rows are selected? 4
